10 Years of Making a Difference - MS Trust Annual Conference 2006

CONFERENCE PREVIEW

Bournemouth, UK, 2- 4 November, 2006.

This year's Annual Conference will celebrate the progress made in delivering effective MS care and management during the past 10 years. It will also explore the challenges faced in continuing to develop and improve MS services for the future, alongside a wide range of practical clinical topics.

We are delighted that Dr Fred Foley, Director of Neuro-psychology and Psycho-social Research at the MS Center in New Jersey will be joining us to share his knowledge on improving coping skills, sexual function and mood in MS.

The programme will contain a number of plenary sessions, which will explore topics such as: 'Demographics – the facts and the challenges they present for the future', 'A decade of progress for MS: what next...?' and 'The case

for specialist practice: MS specialist nurse and specialist therapist perspectives'. In the closing plenary session Dr Eli Silber (Consultant Neurologist, Kings College Hospital) will discuss both clinical and service development innovations for the future.

A choice of seminar sessions are available on the programme, to allow delegates to tailor the programme to their individual learning needs, topics include;

- Visual problems in MS
- Effective use of outcome measures in MS
- Sex: how far should we go...?
- 'The dog ate my trainers!' – motivating reluctant exercisers
- Managing bowel dysfunction in MS

- Ethical issues surrounding vulnerable adults
- Vocational rehabilitation in MS
- Impact of fatigue on dysarthria in MS

We have also introduced a new sharing best practice and innovation forum this year, where six speakers will share their experiences from different aspects of MS care and service delivery; topics will include 'Developing a care pathway for pregnancy in MS' and 'Experiences and benefits of a new self referral system'.
