Advanced lectures on Neuroimaging topics are being given on WEDNESDAY EVENINGS during the Autumn term 2004. These lectures are for senior and junior clinicians, as well as non-clinical scientists seeking information on new advances in medical research. The first lecture will commence at 5.00pm; there will be a break for coffee at 5.40pm and the second lecture will commence at 5.50pm. The venue will be the Wolfson Lecture Theatre, National Hospital for Neurology and Neurosurgery, Queen Square, London WC1. All those interested are invited to attend, free of charge, on production of a valid identity card.

Wednesdays:  
20 October - 8 December 2004

The lecture programme is available on our website at www.ion.ucl.ac.uk or from:  
Students Office

Dr Sunny Philip - Consultant Paediatric Neurologist from Birmingham Children's Hospital - epilepsy and children - Paediatric Services.
Catherine Doherty - Epilepsy Specialist Nurse for Learning Disabilities, South Birmingham PCT. The role of the Learning Disability ESN.

"Best Practice in Epilepsy Care"
A Conference for professionals
addressing best practice healthcare for people with epilepsy

Tuesday 23rd November 2004
Hornton Grange, Birmingham University

For further information, please contact Richard Edgar at redgar@epilepsy.org.uk, or phone 0113 2108800.
Alternatively see the Epilepsy Action website at www.epilepsy.org.uk/services/seminars
Organised by The Brain Injury Rehabilitation Trust, Brain Injury Services and Kemsley, National Centre for Brain Injury Rehabilitation.

Conference speakers will address issues relating to the provision and monitoring of services incorporating quality standards and clinical governance.

The impact of the emerging National Service Framework for Long Term Conditions and issues of Capacity, Consent and Human Rights in the treatment of Brain Injury will also be explored.

For a copy of the conference programme and booking form, or for details of exhibition/sponsorship opportunities, contact Martyn Smythe-Hudson on 01604 616226 or Eve Whitworth on 01763 255609, email kemsley@standrew.co.uk or ewhitworth@partnershipincare.co.uk

**Spasticity Evidence Based Measurement and Treatment**

A conference with focus on all clinical aspects of spasticity (Pathophysiology, Measurement and Treatment)

9 - 11 December 2004
Centre for Life, Newcastle upon Tyne, UK

**Highlights**

- Expert presentations on the pathophysiology and impact on spasticity
- Current reviews of available therapeutic modalities
- A review of state of the art in measurement techniques
- Multidisciplinary treatment workshops for:
  - Physicians on the management of adult spasticity and pain
  - Therapists on the rehabilitation of adult spasticity
  - Physicians, Surgeons, Therapists and Orthotists on the management of CP in children
- Free poster session (max of 50 posters) and oral presentations of 8 - 10 selected abstracts
- A best presentation award
- Networking opportunities over lunch and dinner

**International Speakers**

- Professor Mike Barnes, Hunters Moor Hospital, Newcastle upon Tyne
- Professor John Rothwell, Institute of Neurology, University of London
- Dr Tony Ward, North Staffordshire Rehabilitation Centre, Stoke-on-Trent
- Professor Alberto Albanese, Università Cattolica del Sacro Cuore, Italy
- Dr Paulette M. van Vliet, University of Nottingham, Nottingham

For more information contact: Tania Cherry, CREST, University of Newcastle upon Tyne, Stephenson Building, Claremont Road, Newcastle upon Tyne, NE1 7RU. Tel: 0191 222 6170, E. tania.cherry@ncl.ac.uk, Website http://www.ncl.ac.uk/spasm For further details of the conference and to register please log on to www.spasmproject.org/conference.php
Although as yet unlicensed, intradetrusor injections of Botulinum Toxin are becoming recognised as a highly successful second line treatment for the overactive bladder. This course will cover its history and how it might work in the bladder, including a demonstration of it being injected as a minimally invasive outpatient procedure, and should allow practitioners to feel ready to join the many urologists, uro-gynaecologists, neurologists and rehabilitation doctors now using this novel technique.

**Course fee £100**

For further details please contact:
